CMS LED Light Code

Control and Monitoring System · https://husqvarna-water.com/knowledgebase/cms-led-light-code/

The CMS Control Unit has an LED light that changes color based on what it is doing.

If you do not see any lights press the reset button once. This will wake up the device and within 10 seconds you should see a light. If you do not see a light after 10 seconds, then check or change the batteries.

Below is a table with the current colors and their corresponding activity.

Device Status	**LED behavior**
Ready for Pairing	Blinks Blue every 5 seconds
Connecting/Disconnected	Blinks White
Connected/Idle	Solid Green
Low Battery	Blinks Red
Rain Delay	Blinks Yellow
Watering in Progress	Blinks Green
Identify	Blinks Red, Green, and Blue
Factory Reset	Rapid Red blink until reset
Asleep Blinks	Green and White

To reset the CMS to factory settings, press the reset button quickly 5 times.
